Baker Tilly Cambodia (BTC), a part of the global network of Baker Tilly firms spanning over 145 territories, is dedicated to uplifting communities through robust corporate social responsibility (CSR) initiatives.

Focused on talent development and skill-building, BTC's efforts are particularly aimed at supporting underprivileged youth in Cambodia. On March 28, 2024, Baker Tilly Cambodia reinforced its commitment to social responsibility and technological empowerment by donating essential IT equipment to Circular Digital Lab Cambodia.

This contribution is part of BTC's ongoing initiative to bridge the digital divide and enhance IT skills among Cambodian youth, especially in rural areas. "Circular Digital Lab Cambodia's mission to manage e-waste and improve digital literacy aligns perfectly with our objectives.

We are proud to support their endeavors that not only enhance digital skills but also pave the way for a more sustainable and inclusive future," stated Oknha Tan Khee Meng, Managing Partner at Baker Tilly Cambodia.

Children from Full Gospel Assembly Child Care Center using laptops donated by Baker Tilly Cambodia for their online learning.

This partnership highlights Baker Tilly's core values of integrity, sustainability, and community service, driving its efforts to foster significant and lasting impacts. The equipment donated includes laptops, printers, and UPS devices, which are crucial in facilitating access to digital education and resources.

Moreover, in July 2020, during the peak of the COVID-19 pandemic, BTC made a significant contribution to the Full Gospel Assembly Child Care Center in Cambodia by donating batch of laptops. This initiative allowed children to continue their education remotely during school closures, thereby ensuring that their learning journey was uninterrupted.

These actions are testament to Baker Tilly Cambodia's belief that skill development is key to empowering youth and building the country's future economic strength. Through these initiatives, BTC aims to nurture a generation that is not only tech-savvy but also capable of driving forward Cambodia's development.

Baker Tilly Cambodia remains committed to its role in fostering an environment where young people can gain the skills necessary to thrive in a digital world, reinforcing the firm's dedication to creating opportunities and enhancing lives through technology.
